

MINISTRY OF COAL / CMPDI ENVIRONMENTAL COMPLIANCE AUDIT

Half-Yearly Statutory Compliance Report · MoEFCC EC Conditions

ANNUAL ENVIRONMENTAL MONITORING DOSSIER (2025-26)

Monitored Mines: Gevra, Kusbunda, Dipka, and Rajmahal Coalfields

Reporting Period: October 2025 to March 2026

Document ID: doc-cmpdi-env-2026 | Clearance Ref: J-11015/12/2020-IA.II(M)

1. AMBIENT AIR QUALITY MONITORING (CPCB / DGMS STANDARDS)

Continuous Ambient Air Quality Monitoring Stations (CAAQMS) deployed around mine boundaries yielded the following 24-hour average readings:

- Particulate Matter PM10: 68.4 $\mu\text{g}/\text{m}^3$ (Statutory Prescribed Limit: 100 $\mu\text{g}/\text{m}^3$ - COMPLIANT)
- Particulate Matter PM2.5: 38.2 $\mu\text{g}/\text{m}^3$ (Statutory Prescribed Limit: 60 $\mu\text{g}/\text{m}^3$ - COMPLIANT)
- Sulphur Dioxide (SO₂): 18.5 $\mu\text{g}/\text{m}^3$ (Prescribed Limit: 80 $\mu\text{g}/\text{m}^3$ - COMPLIANT)
- Nitrogen Oxides (NO_x): 24.1 $\mu\text{g}/\text{m}^3$ (Prescribed Limit: 80 $\mu\text{g}/\text{m}^3$ - COMPLIANT)

2. MINE WATER REGIME & EFFLUENT TREATMENT

- Mine Sump Water Discharge pH: 7.42 (Within neutral permissible range 6.5 - 8.5)
- Total Suspended Solids (TSS): 28.0 mg/l (Statutory Limit: 100 mg/l)
- Heavy Metals (Fe, Cr, As, Pb): Below Detectable Limits in discharge flumes.
- Water Recycling: 85% of pumped mine sump water is reutilized for dust misting sprays, haul road suppression tankers, and coal handling plant (CHP) washing circuits.

3. AFFORESTATION & GREEN BELT STRENGTHENING

- Cumulative Saplings Planted on Overburden Dumps: 185,000 native tree species.
- Overall Survival Rate: 84.5% across reclaimed decoaled benches.
- Certified by: State Pollution Control Board & CMPDI Environmental Division.
